Apps and repeated mobile runs

I compared the APK, WebView, PWA, store and pure browser routes. The version and measurement profiles pertain to the specified runs. Local package IDs designate the run containers. The app file's details include its publisher and signature; the information is approved. For Bison and Stake the result of the territorial control is visible before an attempt to bet.

Brand	Route source	Android / iOS
NV Casino	Android 8.0+, in the configuration download is allowed; iOS 12+ is enabled without downloading a file.	Samsung Galaxy S25 Ultra · Android 16 · One UI 8; iPhone 17 Pro · iOS 26
Stake	Web access without download; the control Android and iOS containers repeat the browser route.	Samsung Galaxy S25 Ultra · Android 16 · One UI 8; iPhone 17 Pro · iOS 26
Total Casino	Android 6.0+ and the native App Store route are described by the operator; WKWebView is used for transitions to authorization and payment.	Samsung Galaxy S25 Ultra · Android 16 · One UI 8; iPhone 17 Pro · iOS 26
Ice Casino	Android 8.0.0+ is allowed in the configuration, rating 4,5. The FAQ describes access without a dedicated app. iOS 12+ is enabled without download, rating 4,6.	Samsung Galaxy S25 Ultra · Android 16 · One UI 8; iPhone 17 Pro · iOS 26
Bison Casino	The Bison Manifest with display standalone describes a PWA. The control APK and WKWebView repeat the web route up to the access screen.	Samsung Galaxy S25 Ultra · Android 16 · One UI 8; iPhone 17 Pro · iOS 26
Mostbet	The menu contains Android/Apple and Mobile Version. In the episode the APK and WKWebView are described for the mobile run.	Samsung Galaxy S25 Ultra · Android 16 · One UI 8; iPhone 17 Pro · iOS 26
22bet	Android and iOS were compared in the browser route up to the profile and cashier.	Samsung Galaxy S25 Ultra · Android 16 · One UI 8; iPhone 17 Pro · iOS 26
Bitguruz	The episode uses iPhone with mobile web; Android was verified in the control browser route.	Samsung Galaxy S25 Ultra · Android 16 · One UI 8; iPhone 17 Pro · iOS 26

NV Casino · Android and iOS

After launch, rotation and network switching	Lobby, card and playing field loaded. After rotation the controls were preserved, the cashier opened as a separate screen.	Lobby, card and playing field loaded. After rotation the controls were preserved, the cashier opened as a separate screen.

Browser runs — Google Chrome 146.1.16 (android), Mozilla Firefox 146.1.32 (android), Safari 26.1.28 (ios), Mozilla Firefox 146.1.9 (ios). Cold start was counted from the icon tap after process termination and session cache reset to the available menu or admission screen. Warm — from reopening to the same state. A separate series was counted from opening the card to the interactive field.

When the network stopped, I waited for re-synchronization and checked the ID in the history. Accepted bets are visible by server status. Until it appeared, the repeat was not launched. Changing orientation changed the visible field; upon return, the round stage was preserved.

Mobile builds and permissions

Minimum OS	In operator descriptions Total Android 6.0+, NV Android 8.0+ / iOS 12+, Ice Android 8.0.0+ / iOS 12+. Control containers Android 8+ and iOS 12+, runs on Android 16 and iOS 26.
Architecture	Android arm64-v8a, iOS arm64; Android ABI is taken from the container environment, iOS uses the system WebKit.
Checksum	The control hash refers to the exact bytes of the signed APK; the profile identifier contains the package ID and build. The browser route is verified by origin and container version.

Parameter	Condition and value
Update	I verified the build before relaunching, kept the account and recalculated the cold streak after the update; I tied the previous streak to its version.
Requested permission	INTERNET in Android, camera during document verification, push by separate consent; iOS app permissions are governed by the system dialog.
Action that triggers the request	Camera at the start of KYC; notifications when enabling them in the operator profile.
Behavior on refusal	On refusal the camera remains off; documents can be selected from an allowed system file, the protected step waits for confirmation.
Push	Notifications are enabled in a separate run after the user's choice; without permission the result is read in the cashier and history.
Biometric login	In the control profile, login is tied to the password and account verification. Screen lock does not replace operator authentication.
Offline behavior	After disconnecting the network a pause appeared, the relaunch waited for a connection; the server-side accepted was verified in the history.
