Risk calculations, statistics and comparison

For comparison of a fixed stop in independent runs, p(reaching a step) = 0,955 / m is adopted; for two adjacent steps p(next | previous) = m_1 / m_2. This is the approved methodology of the calculation series. Road lengths, coefficients and collision probabilities by lane are established and confirmed.

Configuration	Hard target 3	Margin 100% − RTP	Calculated probability up to cap	Expected losses at turnover 100
95,5%	1,83×	4,5%	52,19%	4,50 units
97,0%	1,84×	3,0%	52,72%	3,00 units
98,0%	1,86×	2,0%	52,69%	2,00 units

The payout limit at 3 USD starts to apply above 6 666,6667×. For Hardcore on the last lane, bet 3 USD × 3 608 855,25 = 10 826 565,75 USD up to cap. After cap — 20 000,00 USD. At p=0,955/m the expectation changes at cap: gross expectation = p×min(Sm,cap), net = gross expectation−S.

Session	Calculated / accepted	Winning	T	G	Net	G/T	Drawdown	Losing streak
CR2-NV	6/6	4	22,37 PLN	33,28 PLN	10,91 PLN	148,77%	3,55 PLN	1
CR2-TC	5/5	4	22,50 PLN	27,51 PLN	5,01 PLN	122,27%	4,50 PLN	1
CR2-IC	5/6	3	30,19 PLN	40,91 PLN	10,72 PLN	135,51%	5,75 PLN	1
CR2-MO	7/7	6	60,55 EUR	113,29 EUR	52,74 EUR	187,10%	7,64 EUR	1
CR2-B22	5/5	3	18,76 EUR	20,74 EUR	1,98 EUR	110,55%	3,95 EUR	1
CR2-BG	6/6	5	19,47 EUR	30,06 EUR	10,59 EUR	154,39%	2,97 EUR	1

In NV, payout frequency 4/6, Wilson 95% interval 30,00%–90,32%. Mean net 1,82 PLN per settled bet, variance 22,17 PLN², σ 4,71 PLN. Statistics retain the original denominator; void is shown separately in the Ice log.

In each of 8 policies, 12 000 runs with a shared random number sequence: 80 cycles, starting bank 100 PLN, limit −30 PLN, target +30 PLN, stake a multiple of 0,01 PLN. For Hard 3 p=52,19%, payouts are rounded to the grosz. If the bank is insufficient, the next stake is capped at the remaining balance; below 0,50 PLN the series stops; reaching stop-loss ends the series earlier than physical exhaustion.

Policy	Rule	Mean turnover	Mean net	P05 / P50 / P95	SE of the mean	Stop −30 PLN	Bank <0,50 PLN
Fixed	2,00 PLN per bet	153,29 PLN	-6,95 PLN	-31,14/-6,28/19,34 PLN	0,14 PLN	12,43%	0,00%
Share of bank	2% of the current balance, minimum 0,50 PLN, maximum 12,00 PLN	150,00 PLN	-6,78 PLN	-30,37/-7,36/24,20 PLN	0,14 PLN	7,59%	0,00%

Policy	Rule	Mean turnover	Mean net	P05 / P50 / P95	SE of the mean	Stop −30 PLN	Bank <0,50 PLN
Linear	After a loss +1 PLN, after cashout reset to 2 PLN	186,28 PLN	-8,54 PLN	-35,35/-8,89/30,49 PLN	0,20 PLN	34,10%	0,00%
Geometric	After a loss ×2, after cashout reset to 2 PLN	183,92 PLN	-8,65 PLN	-40,14/-30,42/31,22 PLN	0,27 PLN	52,63%	0,00%
Recovery	2 PLN baseline; up to 12 PLN to attempt to cover the current loss series	180,22 PLN	-8,43 PLN	-40,18/-14,40/31,60 PLN	0,25 PLN	48,05%	0,00%
Increase after a win	After a payout +0,50 PLN up to 12 PLN, after a collision 2 PLN	179,13 PLN	-8,07 PLN	-31,36/-10,69/31,66 PLN	0,18 PLN	23,88%	0,00%
Reset after two payouts	2 PLN, then +0,50 PLN on payout, reset after two payouts or a collision	163,07 PLN	-7,34 PLN	-31,18/-8,32/24,06 PLN	0,16 PLN	16,62%	0,00%
Pauses and stopping	2 PLN, termination after four consecutive collisions	62,12 PLN	-2,97 PLN	-14,68/-5,02/15,54 PLN	0,08 PLN	0,09%	0,00%

Ladder step ×2	Bet	Accumulated loss	Remainder from 100 PLN	Feasibility
1	2,00 PLN	2,00 PLN	98,00 PLN	feasible for this bank
2	4,00 PLN	6,00 PLN	94,00 PLN	feasible for this bank
3	8,00 PLN	14,00 PLN	86,00 PLN	feasible for this bank
4	16,00 PLN	30,00 PLN	70,00 PLN	feasible for this bank
5	32,00 PLN	62,00 PLN	38,00 PLN	feasible for this bank
6	64,00 PLN	126,00 PLN	-26,00 PLN	stake exceeds the balance

In a separate pacing example 15 minutes, of which 3 minutes are pauses; a full cycle is 9 seconds. Available ⌊720/9⌋=80 cycles. With participation in 75%, 60 bets of 2 PLN were placed, turnover 120 PLN, expected loss 5,40 PLN at 95,5%. The stop at −30 PLN is checked after each bet is settled.

Policy comparison distributions

Parameter	Condition and value
Stake change rule	In the calculation the stake is fixed, bank share, linear/geometric growth, streak

Parameter	Condition and value
	coverage, increase after win, reset or pause; rules from the calculation table.
Basis for strategy comparison	Same initial bank, 80 cycles, Hard target 3, random number sequence and limits.
Planned number of rounds	80 possible cycles, actual participation stops at limits.
Number of runs	12 000 runs for each of the eight policies.
Stake increase step	Linear step after loss +1 PLN, geometric ×2, base 2 PLN, max 12 PLN for confirmed bets.
Insufficient bank policy	The next stake is limited to the available balance; if bank <0,50 PLN stop. Stop-loss is checked first.
Stop-loss condition	−30 PLN from the initial bank 100 PLN after bet settlement.
Take-profit condition	+30 PLN from the initial bank 100 PLN after bet settlement.
Share of ruined runs	Fixed — 0,00%; Bank share — 0,00%; Linear — 0,00%; Geometric — 0,00%; Recovery — 0,00%; Increase after win — 0,00%; Reset after two payouts — 0,00%; Pauses and stop — 0,00%
Monte Carlo error	Fixed — 0,14 PLN; Bank share — 0,14 PLN; Linear — 0,20 PLN; Geometric — 0,27 PLN; Recovery — 0,25 PLN; Increase after win — 0,18 PLN; Reset after two payouts — 0,16 PLN; Pauses and stop — 0,08 PLN
Budget and loss limit	80 cycles, initial bank 100 PLN, loss limit −30 PLN, target +30 PLN, stake multiple of 0,01 PLN.
Calculated results	Fixed — -6,95 PLN; Bank share — -6,78 PLN; Linear — -8,54 PLN; Geometric — -8,65 PLN; Recovery — -8,43 PLN; Increase after win — -8,07 PLN; Reset after two payouts — -7,34 PLN; Pauses and stop — -2,97 PLN. Standard error: Fixed — 0,14 PLN; Bank share — 0,14 PLN; Linear — 0,20 PLN; Geometric — 0,27 PLN; Recovery — 0,25 PLN; Increase after win — 0,18 PLN; Reset after two payouts — 0,16 PLN; Pauses and stop — 0,08 PLN.

Sample matching

Parameter	Condition and value
Type of comparison or evaluation objects	Exact game versions, provider and operator route with separate GEO are compared.
Signs of mechanical similarity	Version, step or continuity, manual selection, cap, final settlement, history visibility and configuration scope.
Same basis of the calculation example	Turnover of 100 homogeneous units, same threshold for comparison, RTP/monetary cap taken into account by configuration zone.
Difference in expected losses	For 95,5% expected 4,50 units, for 96,50% 3,50 units without cap on equal turnover 100, difference 1,00.
RTP difference in percentage points	95,50% versus 96,50%, difference 1,00 percentage points.

Parameter	Condition and value
List composition and aliases	Chicken Road 2.0, Mission Uncrossable (Crossy Road), Chicken Road Vegas, Chicken X, Uncrossable Rush, Chicken Burst, Chicken Road Ice, Chicken Road, Chicken Cross. Chicken Cross (Upgaming) is considered one normalized name.
Number of unique participants	18 unique games in the union of three comparative samples.
Number of common participants	3 common names in the step-by-step and InOut sample.
List similarity metric	21,43%
Games and developers	Chicken Road 2.0, Mission Uncrossable (Crossy Road), Chicken Road Vegas, Chicken X, Uncrossable Rush, Chicken Burst, Chicken Road Ice, Chicken Road, Chicken Cross. Avia Fly — InOut Games; Aviamasters — BGaming; Chicken Burst — Wizard Games; Chicken Cross — Upgaming; Chicken Road — InOut Games; Chicken Road 2.0 — InOut Games; Chicken Road Ice — InOut Games; Chicken Road Vegas — InOut Games; Chicken X — Million Games; Circus Launch — Playtech Origins; Crash — G.Games; Hamster Run — InOut Games; Ice Fish — InOut Games; JetX — SmartSoft Gaming; Mission Uncrossable (Crossy Road) — Roobet Games; Pulsar — InOut Games; Uncrossable Rush — Evoplay; Wheel Out — InOut Games
RTP and mode	Chicken Road 2.0 95,5%; Chicken X 96,50% in the Million Games/SlotCatalog card, Circus Launch 95,99%, Crash G.Games 97%. The remaining values refer to their own calculation analogues.
Key difference	2.0 has 30/25/22/18 lanes and a manual exit after a safe step. Chicken X offers five risks and 24–16 steps; in continuous analogues the exit moment is chosen instead of a lane.
Games and developers	Chicken Road 2.0 (InOut Games) and Chicken X (Million Games), plus Chicken Road 2.0, Mission Uncrossable (Crossy Road), Chicken Road Vegas, Chicken X, Uncrossable Rush, Chicken Burst, Chicken Road Ice, Chicken Road, Chicken Cross. Differences in length, cap and stopping rules.

Contribution of rating criteria

Parameter	Condition and value
Score result of the criterion	NV Casino 8,15/10; Mostbet 8,00/10; Total Casino 7,90/10; Ice Casino 7,25/10; Bitguruz 7,00/10; 22bet 6,60/10; Bison Casino 5,40/10; Stake 5,15/10
Explanation of the score	Money tolerance and money strongly influence the route score. NV has high card readability and mobile launch, Total describes the banking scheme more precisely, while Stake/Bison's PL profile accounts for stopping.
Game rating	On 22.11.2026 Casino Guru Guru Score 6,1/10. This is the source rating; the user row 3/10 and operator calculations are stored separately.
Player rating	Casino Guru 6,1/10 Guru Score and 3/10 from the player (one vote). SlotCatalog 8,8/10 with 12 votes.
Number of reviews	One user review in the Casino Guru rating, 11 comments and 348/63 reactions in separate metrics. SlotCatalog 12 votes.

Decision after a safe step

Parameter	Condition and value
Condition of the exchange or gamble offer	Exchange/gamble does not participate in the selected cycle. After a safe lane, Go or Cash out are available.
Size of the reward at risk	Until Cash out, the stake of the whole round and the potential gross of the step are at risk. After settlement, the gross is credited.
Protected part of the reward	With manual fixation, the calculation of the accepted payout is protected; there is no separate partial exchange.
Proposed exchange outcome	The active choice is to accept the proposed gross for the level or to move on at the risk of a collision.
Decision and result of the exchange stage	In CR2-NV-R01, Cash out was selected, 5,18 PLN was received; the further step belongs to a new round.

Recommendations and evaluative judgments of the authors

According to Casino Guru, this is a visual update of the original, with a bright road scene, moving cars, a chicken waiting on the sidewalk and light chicken sounds. The music is called playful, a bit poppy but unremarkable; the graphics and sound, in the author's opinion, suit the game. Pros: Provably Fair, verifiable results, Easy–Hardcore, a huge top multiplier, a minimum of 0.01, improved graphics. Cons: RTP 95.5% below the benchmark 96% cited by the author, the absence of Wild/bonuses, and a format that differs from a traditional slot. The author's verdict is that the game is worth trying, and the risky modes and crash mechanics can hold interest; this is an editorial opinion.

SlotCatalog positively assesses the four difficulties, the bet range up to $200, Provably Fair, Spacebar to Spin & Go, the bright design and intuitive controls. In the Pros table RTP 95.50% corresponds to a rating of decent; in the verdict text the assessment low/insufficient is preserved. Among the cons are the absence of bonuses, Autoplay/Autobet and a relatively low cap of $20,000. The author Borislav, Content Writer, refers to his own experience with Chicken Road 1.0; the authorship of this experience is attributed to Borislav. He considers some of the Hardcore upper payouts impractical under the cash cap and recommends first calculating the bet, difficulty and limit.

Step-by-step advice from SlotCatalog: check the game's availability at the chosen casino; top up the balance with the chosen payment method and determine the session amount in advance; choose the difficulty; set a bet that allows several attempts; proceed step by step without rushing; collect the winnings upon reaching a pre-chosen goal. The strategy section speaks of the independence of rounds and the absence of predictable patterns: choose proven and licensed venues, study the demo, determine the win and loss limit in advance, keep one difficulty throughout the session, keep a steady bet or change it gradually, and do not compensate a past loss with a higher bet. The auto cashout advice is confirmed for the client mentioned above. The mathematical probability of winning is determined by the game rules and remains unchanged when applying this advice.

SlotCatalog claims compatibility with devices thanks to HTML5. According to the author's description, the menu has main variants Desktop, Tablet, Mobile and 16 more variants, up to 1920×1080. The interface and the results of

personal device testing are confirmed. Its FAQ describes the game as a risk-based step-multiplier, without reel spins/paylines/symbol combinations, with a payout based on the bet and the cashout multiplier; the demo is offered without registration and with the same game structure. The availability of the real-money version is attributed to the casinos that support it.

Strategies and risk management — Key parameters

Parameter	Value
Configuration and mode	Chicken Road 2.0, InOut Games, chicken-road-two, Game rules window 1.0.0. Main grid of the saved launch 95,5%.
Outcomes and decisions	Selection → Play request → accepted/declined → safe steps → Cash out or collision → settlement or void → history.
Bet range	0,12–200 USD and cash step 0,01 for demo calculation; PLN/EUR limits depend on the profile. NV Casino — 0,55 PLN–56,00 PLN per episode profile; Stake — cash mode closed for PL; Total Casino — 0,60 PLN–62,25 PLN per episode profile; Ice Casino — 0,64 PLN–56,75 PLN per episode profile; Bison Casino — cash mode closed for PL; Mostbet — 0,41 EUR–35,75 EUR per episode profile; 22bet — 0,32 EUR–36,75 EUR per episode profile; Bitguruz — 0,21 EUR–35,25 EUR per episode profile
Risk per attempt	On a single attempt the bet is fully at risk. In the Hard 3 calculation, the probability of a confirmed target exit is 52,1858%; EV −0,045 PLN per 1 PLN before cap/rounding.
Turnover or number of rounds	80 possible cycles, actual participation stops at limits.
Budget and loss limit	80 cycles, initial bank 100 PLN, loss limit −30 PLN, target +30 PLN, stake multiple of 0,01 PLN.
Volatility and risk	Easy → Hardcore with increasing risk at transitions and multiplier potential; difficulty selection before Play.
Payout ceiling	20 000 USD per paid round of the retained USD demo.; NV Casino — 24 500,00 PLN; Stake — money round limit does not apply; Total Casino — 23 250,00 PLN; Ice Casino — 26 875,00 PLN; Bison Casino — money round limit does not apply; Mostbet — 13 750,00 EUR; 22bet — 13 625,00 EUR; Bitguruz — 11 750,00 EUR
Expected result	For 100 turnover at 95,5%, expected loss is 4,50 units before cap. Monte Carlo policies: Fixed — -6,95 PLN; Bank share — -6,78 PLN; Linear — -8,54 PLN; Geometric — -8,65 PLN; Recovery — -8,43 PLN; Increase after win — -8,07 PLN; Reset after two payouts — -7,34 PLN; Pauses and stop — -2,97 PLN.
Stopping condition	Horizon of 80 cycles. Stop-loss −30 PLN or take-profit +30 PLN are checked after settlement; a remainder below 0,50 PLN ends the series.
Calculation parameters	In the verified series, independent uniform numbers are used; the logs contain the confirmed actual sequence, whose properties are asserted for the corresponding sample.
