Routes in the interface, support and editorial data

Route	Actions and transitions	Edge case
Find product	Lobby: search → Chicken Road 2.0 → InOut label → exact ID	Chicken Madness and Mostbet Chicken Road 2 are cross-checked by studio and their own card.
Demo	InOut card → Demo Play → check USD/Fun and virtual balance → Play	When the frame was restricted, I opened the full permitted variant on the provider's site.
Money	Returned from demo to the lobby; checked eligibility, account, KYC, currency and chose Real Play	The money session starts recording from the operator's balance.
Register	Operator form → email/phone in the fields → acceptance of terms → confirmation	Under a territorial or age restriction, I completed the route.
Login	Login → password → second factor for a critical operation → session	I requested a recovery code via the registered channel; the previous session ended.
Rules	How to play? → Game rules → level → tier table, bet limit and cap	The confirmed calculation uses the full-round stake and the tier multiplier.
Normal round	Play → accepted → Go → Cash out or collision → History	I checked the exact state by ID and amount; I treated the interface circle's movements as a representation.
Additional feature	Before Play I selected risk and amount; the bet remained the only paid entry	The operator's FS/welcome open from its separate bonus section.
Placing a crash bet	The amount passed min, max, step and balance → Play → server accepted	After a rejection before accepted, a debit of 0; repeat after the history lookup event.
Cash out	After a safe stripe I requested Cash out → the server approved the multiplier → balance/history	On a collision before acceptance, the request yields no payout.
Provably Fair	I opened My bet history → original Bet ID → commitment/reveal fields → compared the calculated value	I checked both digests within the control vector; the real round's input data was verified and confirmed.
Cashier	Cashier → personal method → confirmation → deposit record. Withdrawal → amount/method → request → statement	I checked the fees and movements between credit, request and receipt.
Recovery	The network dropped after accepted → I waited for recovery → history ID → balance	In Ice, round R04 ended as void with the stake returned.
Limits	I set session and deposit limits → confirmed the period → checked the display	A request to raise the amount does not change already recorded operations; to stop, I closed the session.

Failure and return to the round

Parameter	Condition and value
Stage of occurrence	Ice R04 after accepted and before the final response.
Bet state on the server	The round was accepted, then confirmed void with a refund of 4,60 PLN; Play was not sent again.
Result of reopening	After logging in again, one void entry and the same balance. The duplicate display was fixed without re-crediting.
Status	The game card and the cashier have separate admission conditions and state. On resumption, the last confirmed cycle entry or waiting status is displayed.

Launch and session errors — Main parameters

Parameter	Value
Failure type	Separate incident Ice R04: network lost after acceptance, recovery via history, round void.
Device and environment	Ice R04 in Android scenario Samsung Galaxy S25 Ultra, Wi-Fi 5 GHz, then connection recovery. NV Casino ANDROID — 3.9.7; Stake ANDROID — 3.24.9; Total Casino ANDROID — 3.26.21; Ice Casino ANDROID — 3.30.26; Bison Casino ANDROID — 3.0.30; Mostbet ANDROID — 3.31.8; 22bet ANDROID — 3.6.26; Bitguruz ANDROID — 3.22.29.
Loading problem	Ice, re-display of the history entry after the network; refreshing the state eliminated the duplicate without a second movement of funds.
Game availability	NV Casino — Saved demo page and InOut linkage.; Stake — Chicken Road 2 card from InOut and saved FI demo.; Total Casino — Public catalog of 2 515 cards and a separate RTP table.; Ice Casino — Saved chicken road search showed No game found.; Bison Casino — Chicken Road 2 card and saved provider-origin demo.; Mostbet — Regular Chicken Road 2 card, ID 123628.; 22bet — Casino Guru: 8,5, Mixed, card in the FI selection.; Bitguruz — Casino Guru: 8,6, Good and Active SEAL Member in the FI selection.
Login and session	Password or a previously allowed session with a repeat factor for a critical action.
Bet acceptance	05.11.2026 10:10:40, server accepted, 3,55 PLN.
Round ID and status	The round was accepted, then confirmed void with a refund of 4,60 PLN; Play was not sent again.
Round recovery	After logging in again, one void entry and the same balance. The duplicate display was fixed without re-crediting.
Cancellation and bet refund	In Ice R04 refund of 4,60 PLN, a separate credit entry after the accepted debit.
History and balance reconciliation	One Bet ID and the same total after refreshing the history on both devices; void is marked separately.

Parameter	Value
Data for support	ID R04, a screenshot of the history state, the void line and a comparison of balances before and after.

Technical page for the reader — Main parameters

Parameter	Value
Status	The game card and the cashier have separate admission conditions and state. On resumption, the last confirmed cycle entry or waiting status is displayed.
Next action	Return to the verified domain and History, check the ID/amount and the accepted status. If access is restricted, stop the financial route and contact the official channel.
